

I-75 Reconstruction Bay Region (Design-Build)

Questions & Answers #1

Question #1: What time are questions due by on 4/12/2019? Also what time are the SOQ due by on 4/19/2019?

Answer #1: An addendum will be issued with the time of day that questions and SOQ's are due.

Question #2: Per Attachment E, the Alternate Paving Bidding (APB) Classification check boxes, the box showing the submitter may be submitting on "Either Concrete Pavement or HMA Pavement" states "Submitters selecting this option must be capable and prequalified in both Concrete Pavement and HMA Pavements and may determine which option to pursue during the RFP phase of the Project."

Does this mean a submitter who meets the Fa prequalification requirement but does not have both B & Cb prequal cannot select the either box even though that submitter plans to subcontract the paving portion of the project and no designs have been complete at this time to determine which pavement would be the best value?

Answer #2: An addendum will be issued to remove this statement from the RFQ.
